Alan -

Just wanted to let you know that everyone at Cablik Enterprises did a great job with getting my house built. It was a great process and I'm super happy with the way things turned out.

I also wanted to let you know that it was a real pleasure finalizing the house with Bobby Roberts. He was always positive and he followed through with everything he started. It was a great help to have his electrical expertise as well, as that skill set was extremely valuable in finalizing the last few things with the house. With all of our set-backs, Bobby was able to speed up the process and get us on track and finished in a really good time frame. Just wanted to let you know you have a valuable employee that was extremely dedicated.

Thanks again for your help. You exceeded many expectations and delivered an amazing house in the end.

Talk soon - Jason
