

Look for Cablik Enterprises this Spring!

Come out to the Dogwood Festival this weekend at Piedmont Park! Cablik Enterprises will have a booth in the Eco Village section, which is dedicated to companies with sustainable initiatives and products. Learn how we can help you meet your sustainability goals through the LEED, Energy Star, and Earthcraft building programs.

The Festival's Hours are:

Friday April 15th 12 PM – 7 PM
Saturday April 16th 10 AM – 7 PM
Sunday April 17th 10 AM – 5 PM

Decatur GreenFest on Saturday, May 7th at the Decatur Courthouse Square. This one-day festival lasts from 3 PM – 9:30 PM, and benefits the Dogwood Alliance and the Decatur Preservation Alliance.

Modern Atlanta week on June 6 – 11. The week is full of events centered around modern design, and we are excited to be participating in a number of events:

- **Tuesday, June 7th: Modern Atlanta Launch Party**
- **Wednesday, June 8th: Modern Atlanta Studio Crawl.** Stop by to see our new office, see some of our current projects, and learn more about Cablik Consulting!
- **Saturday June 11- Sunday June 12: Modern Tour of Homes.** The week culminates in a weekend tour of the best examples of Atlanta's modern homes. Cablik Enterprises is thrilled to have homes on the tour again this year!

We have moved into our own

Cablik Enterprises is ready to work with you on your upcoming residential or commercial project.

As a fully-licensed general contractor with a professional staff, we are equipped for both new construction and renovations.

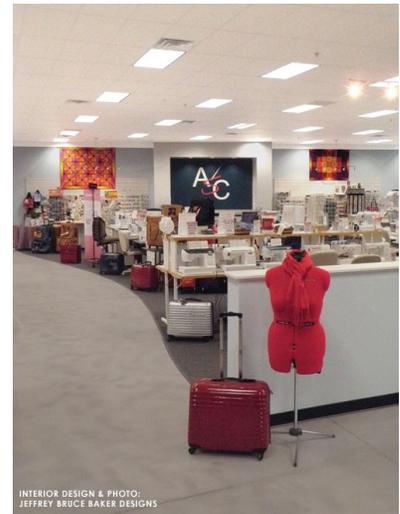

Contact us to get started!

Progress Updates

Atlanta Sewing Center is complete! This tenant improvement project involved an interior build out of a first generation, 6,700 square foot retail space. The scope of the project involved building new interior, seismic wall partitions, modifying the existing ceiling grid, flooring, painting, doors, and hardware. The flooring consisted of carpet and sealed concrete floors. Electrical work included new track lighting, relocating 2x4 fluorescent fixtures, and installing floor outlets in the existing concrete slab. Mechanical and sprinkler work involved relocating existing systems to accommodate the local jurisdiction's code requirements.

On this project, Cablik worked closely with architect Jeffrey Baker and the tenant to value engineer the cost of the project, obtain the permit, and complete the scope of work under a tight time frame.

The Mix

Cablik has completed the turn lane on North Highland Avenue, and we are starting on the site work portion for this upcoming project "The Mix", a mixed use development on North Highland Avenue in the Virginia-Highlands neighborhood of Atlanta.

Elliot Circle Residence

This project is a complete remodel to an existing 1920's home located in Buckhead. The one story single family residence was completely gutted and an entire second floor was added with terrific roof lines.

The new work incorporated a brand new full master suite with claw foot tub, walk in shower, and large walk in closet. The original two bedroom one bathroom house has been transformed into a gracious four bedroom two and a half bath house with a large screened in porch.

Since the home will be an EarthCraft certified project, the house is completely air sealed with spray foam insulation. Construction waste was designed to a minimum and waste material was recycled. New Low E windows combined with twin high efficiency heat pumps will result in a substantial improvement on thermal comfort and utility costs.

We welcome several new projects to our company:

Argonne Residence

This new modern home in Buckhead will be underway shortly! These clients engaged with Cablik Consulting to help them identify the entire homebuilding package: find the right lot, and find the architect that could create the best design for their needs.

After performing due diligence and closing on their new Buckhead lot, the design portion of the process was underway. The clients invited 3 local architects to create a proposed design, based on their needs and wants for their new home.

The architects presented amazing designs, and we are sure it was tough for the clients to pick only one design! After deliberating, they chose Dencity Design as their architect, and we are all working together to get the project started soon.

Skyland Residence

Cablik Enterprises is working on a new residential renovation project in Brookhaven. To meet the growing needs of a growing family, the owners have decided to upgrade their current home with a large first floor addition. The new space will include a complete master suite, family room, walkout deck, two bedrooms, and a laundry room. The age of the home and site conditions make this one yet another challenging project, but Cablik is always up for the challenge.
